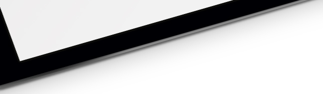
IS IT TIME FOR A WORKPLACE MAKEOVER?

Here’s what other digitally minded organisations said about their challenges, how they’re overcoming them and what’s making them want to change.

Things are changing

36%

of organisations surveyed want to drive **greater innovation.**[1]



35%

said staff now expect **more flexibility** in how they work.[2]

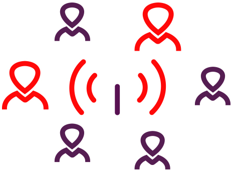
56%

hope to gain **real-time visibility** and control of their application traffic with a **software-defined wide-area network (SD-WAN).**[3]

How will you respond?

60%

By giving people the **tools they need** to work remotely?[4]



56%

By improving the way you **connect** different teams across your office?[5]

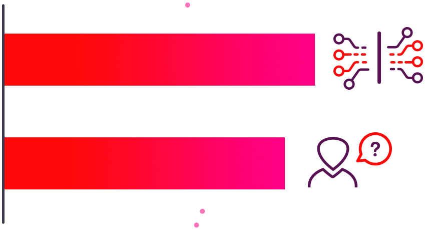
It's not as easy as it looks

31%

can't introduce workspace tools because their IT infrastructure is **too complex.**[6]

28%

lack the **necessary IT skills.**[7]



...especially if you're trying to keep costs down

Almost **60%** said **reducing their operating expenditure** was a key challenge.[8]

55% said **increasing revenues** was one of their top tasks.[9]

interactive text

But there's always room to improve

Over **½** expect their **budgets to increase by more than 1%** for connectivity, workspace, and managed and professional services.[10]

80%

are looking at **advanced analytics and intelligence** to **detect security threats** before they become an issue.[11]

63%

want to use analytics to examine large volumes of their data, and **uncover hidden patterns, similarities and key insights.**[12]

60%

are turning to new tools and software to **improve the way they work** with their colleagues and customers.[13]
